

FIG. 1 is a perspective view of a device 100 in accordance with one embodiment of the present invention. The device 100 includes a housing 102, a motor 104, a fan 106, and a control unit 108. The housing 102 is configured to receive the motor 104, the fan 106, and the control unit 108. The motor 104 is connected to the fan 106, and the control unit 108 is connected to the motor 104. The device 100 is configured to provide cooling for a system.
